

Product description

SPIDERLOC SUCTION CUPS

Thanks to the functional suction cup systems, the towel holder can be repositioned as often as you like, and can be adjusted to your desired height without any surface damage. CandL Spiderloc is the very first suction cup, which thanks to its double vacuum suction system can also be used on slightly uneven surfaces.

The suction cup is durable and easy to install. No tools and adhesives are required for fixing. Furthermore, the double suction system leaves no holes or stains on the wall and can be attached to glass, tiles or metal in no time at all.

Additional Information

Installation instruction

Attach the product to larger surfaces than the suction cup itself, such as: tiles, coated appliances, coated furniture, oil-painted walls, mirrors, windows, etc. Please clean the surface on which you want to apply the product. The suction cup can be used on slightly uneven surfaces up to 1 mm.

Precautions

The suction cup cannot be used on porous surfaces such as cement walls, wallpaper, patterned tiles. Do not place valuable or fragile items on the product. Before reinstalling, wash the bottom of the suction cup with soap and running water to restore permanent hold. It is recommended to rescrew the screw once a month to last longer.
